Precision Packaging, Sharper Presence.

PLASTCRAFT®
INDUSTRIES PVT. LTD.

FOOD SAFETY ISO 22000 MANAGEMENT SYSTEM

PLASTCRAFT® INDUSTRIES PVT. LTD.

REDEFINING PACKAGING EXCELLENCE

Founded in 2021, Plastcraft Industries Pvt. Ltd. is a premier manufacturer of high-precision plastic packaging solutions. Operating out of two state-of-the-art manufacturing units in Indore and Pithampur, Madhya Pradesh, we combine advanced technology, continuous innovation, and rigorous quality control to deliver the perfect packaging solutions that protect products and elevates visual brand presence.

MANUFACTURING CAPABILITIES & TECHNICAL EXCELLENCE

Our fully integrated, production facilities follow the FSMS – Food Safety Management System & are ISO 22000:2018 certified. This enables complete quality control over every stage of manufacturing, guaranteeing consistent performance, batch-to-batch uniformity, and speedy order completion on schedules.

- **Precision Moulding :** High-speed injection moulding lines producing square pails & tamper evident thin-wall containers catering dairy, edible oil, dry powders, dry fruits, paints, lubricants, and agricultural industries.
- **In-Mold Labelling (IML) :** Advanced IML technology delivers seamless visual integration directly onto containers making an everlasting brand image.
- **Sheet Extrusion :** Custom PET, PP, and HIPS rigid sheets for customized/ different thermoforming applications.
- **Fresh Food & Beverage Packaging :** High-clarity PET hinged boxes, PP meal trays, Packaging PP glasses with lids, and PP jelly cups offers a wide range of packaging solution for dairy, confectionery and bakery industries.
- **High-Speed Printing :** Premium & vivid 6-color dry offset printing for PP/HIPS cups for enhanced brand appeal.

Injection Moulding Division

PLASTCRAFT® INDUSTRIES PVT. LTD.

NEXT-GEN SQUARE PAIL CONTAINER IML

Plastcraft's dedicated R&D division continuously drives product excellence through rigorous research into polymer mechanics & mold geometry for more functional product designs. We focus on solving real-world packaging challenges to maximize efficiency, product integrity, and user satisfaction.

PROPRIETARY DESIGN BREAKTHROUGHS

- **Airtight Square Pail Locks :** Features a smooth, easy-lock lid with IML printing that keeps contents leak-proof and protected against tampering. Designed with breakable diagonal outer seals, once empty, these sturdy containers make great, reusable storage boxes for the home.
- **Dual-Seal Dispensing System :** Replaces traditional spouts with a leak-proof liquid dispensing mechanism engineered specifically for oil millers, eliminating mess during transport and end use.
- **Precision Interlocking Stacking :** Custom-contoured lid grooves lock directly into container bases, ensuring stack stability and preventing tipping during warehouse handling and transit.
- **Food & Dairy Sector Focus :** Ideal for packaging edible oil, Ghee, dry fruits, protein powders & other liquid/ non liquid items.

5 LTR / 5 KG SQUARE PAIL CONTAINER

Container Weight	220 ± 10g
Lid Weight	60 ± 5g
Handle Weight	10 ± 2g
Total Weight	290 ± 10g

10 KG CASHEW SQUARE PAIL CONTAINER

Container Weight	560 ± 15g
Lid Weight	130 ± 10g
Handle Weight	18 ± 4g
Total Weight	705 ± 10g

15 LTR / 15 KG SQUARE PAIL CONTAINER

Container Weight	560 ± 15g
Lid Weight	130 ± 10g
Handle Weight	18 ± 4g
Total Weight	705 ± 10g

PLASTCRAFT® INDUSTRIES PVT. LTD.

THIN-WALL IML CONTAINERS RANGE

Plastcraft's specialized high-speed, precision injection molding delivers high-durability thin-wall packaging containers with in-mold labeling (IML). our containers deliver full-coverage, fade-resistant decoration while maintaining structural integrity & product's quality.

- **Extreme Thermal Resistance :** Formulated to withstand sub-zero freezing and microwave heating, ensuring product safety from processing to consumer table.
- **Structural & Seal Integrity :** Features airtight, tamper evident closures that prevent accidental opening, leakage, and contamination during transit and retail display.
- **Food & Dairy Sector Focus :** Ideal for packaging ice creams, fermented dairy, spreads, confectionery, and chilled packaged foods.

1 LTR ROUND THIN WALL CONTAINER

Container Weight	43 ± 3g
Lid Weight	10 ± 2g
Handle Weight	2 ± 0.2g
Total Weight	55 ± 5g

1 LTR SQUARE THIN WALL CONTAINER

Container Weight	40 ± 3g
Lid Weight	19 ± 2g
Total Weight	59 ± 5g

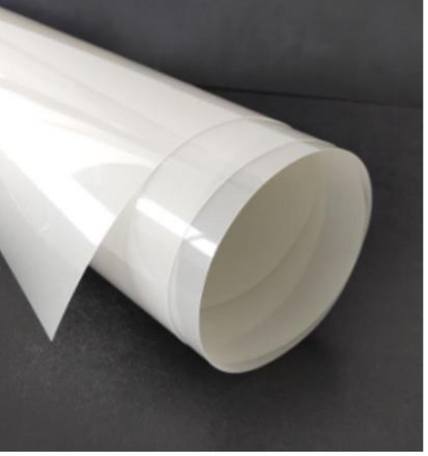
400 GM THIN WALL GLASS

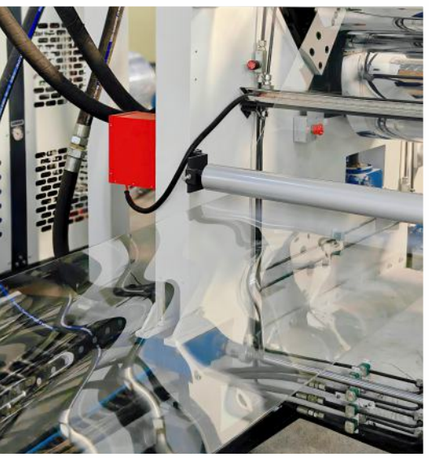
Container Weight	16 ± 1g
Total Weight	16 ± 1g

Capacity : 10/12 Ltr.
Weight : 1.5 kg

MILK POUCH STORAGE CRATE

Plastcraft also offers a milk pouch storage solution: a super sturdy 'Plastic crate', designed to optimize dairy logistics benefitting both operational efficiency and storage problem. Stackable and Space-Efficient crates are designed to stack securely onto one another for maximizing storage space and minimizing floor space requirements. This efficient storage solution helps dairies in optimizing the warehouse and transportation logistic expenses. Also available with attractive 4 side Screen Printing option.





Rigid Plastic Sheet's Division

PLASTCRAFT® INDUSTRIES PVT. LTD.

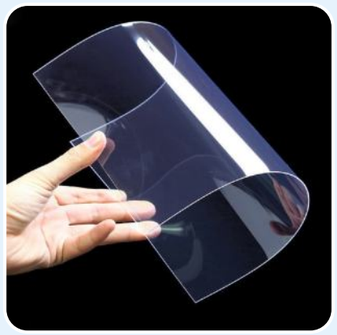
RIGID **PET** SHEETS

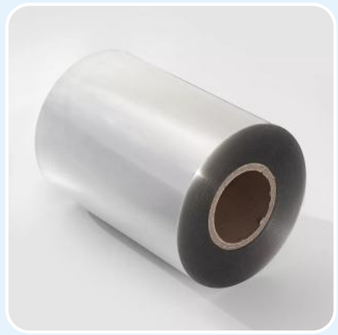
Polyethylene Terephthalate (PET) is the premier thermoplastic material in the thermoforming packaging industry, combining glass-like optical clarity with exceptional structural strength & printability. Engineered for high-speed thermoforming, our rigid PET sheets deliver high-performance packaging that maximizes visual presentation.

KEY PERFORMANCE HIGHLIGHTS

- **Glass-Like Transparency :** Exceptional clarity and scratch resistance surface give packaged goods a premium, crystal-clear appearance on retail shelves.
- **Superior Mechanical Strength :** Outstanding tensile strength and rigidity allow for dimensionally stable, lightweight packaging with reduced wall thickness, lowering material usage without compromising durability.
- **Thermoforming Efficiency :** Engineered for smooth flow and crisp, sharp details during thermoforming. Perfect for precision packing applications like trays, clamshells, blister packs, and electronics packaging.

MATERIAL-PET	GAUGE/ THICKNESS	WIDTH	CORE ID	TREATMENT
Monolayer: A-PET R-PET G-PET	200 to 1500 Microns	Up to 800 mm	76 mm	Surface Silicone Coating or Antiblock Additives





Rigid Plastic PET Sheet Roll Transparent.

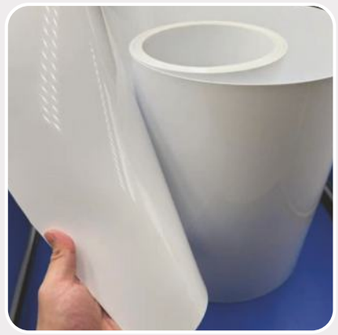
RIGID **PP** SHEETS

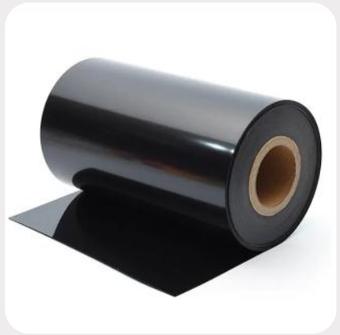
Polypropylene (PP) is an indispensable packaging material valued for its exceptional thermal stability, and material efficiency. Its semi-crystalline structure & OUR advanced processing expertise gives optimal balance of structural durability, lightweight performance, and crack resistance across demanding thermoforming applications.

KEY PERFORMANCE HIGHLIGHTS

- **High Rigidity & Material Efficiency :** Superior tensile strength enables effective down-gauging, allowing for reduced wall thickness without sacrificing the article's stiffness or load-bearing capacity.
- **Exceptional Toughness & Puncture Resistance :** Outstanding flexural durability prevents cracking or splitting, ensuring no impact to the product during handling, transit.
- **Hot & Cold Stability :** Heat & cold resistant sheets designed to withstand from hot fills and microwaveable containers to chilled, ready-to-eat meal packaging solutions.
- **Multi-Industry Versatility :** Purpose-built for high-speed thermoforming of food trays, pharmaceutical packaging, confectionaries & other customised articles. Also offering excellent machinability for vacuum forming.

MATERIAL- PP	GAUGE / THICKNESS	WIDTH	CORE ID
Monolayer & Double Layer	300 to 2000 Microns	Up to 800 mm	76 mm





Rigid Plastic PP Sheet Roll Black & White.

RIGID **HIPS** SHEETS

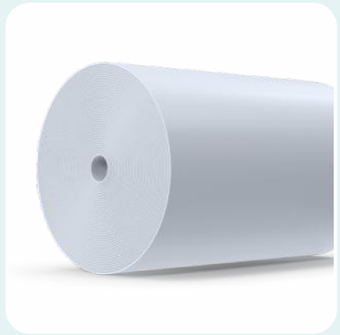
(with & without GPPS Coating)

High Impact Polystyrene (HIPS) is a widely trusted, and impact-resistant material engineered for high-performance thermoforming. By integrating an advanced General-Purpose Polystyrene (GPPS) surface coating, our co-extruded HIPS sheets combine exceptional mechanical toughness with a high-gloss, premium surface finish and outstanding stability for print compatibility.

KEY PERFORMANCE HIGHLIGHTS

- **High-Gloss Surface Aesthetics (GPPS Layer):** The GPPS outer coating delivers superior surface brilliance, smooth printability, and elevated visual appeal for retail packaging displays.
- **Superior Rigidity at Lower Wall Thickness:** Excellent flexural strength enables effective material down-gauging, maintaining structural integrity while reducing article's weight and overall costs.
- **Impact Resistance & Low-Temperature Performance:** High puncture resistance and mechanical toughness prevent cracking or snapping, making these sheets ideal for cold-storage and low-temperature applications.
- **Multi-Industry Versatility:** Safe for food, dairy, and pharmaceutical applications.

MATERIAL- HIPS	GAUGE / THICKNESS	WIDTH	CORE ID
Monolayer & Double Layer	300 to 2000 Microns	Up to 800 mm	76 mm



Rigid Plastic HIPS Sheet Roll White.

- UNCOMPROMISED FRESHNESS.
- YOUR GO-TO HINGED SOLUTION

Thermoforming Division

PLASTCRAFT® INDUSTRIES PVT. LTD.

PET **HINGED** CONTAINERS

Plastcraft's PET Hinged Boxes are attractive food packaging solutions crafted from inhouse best quality & high-clarity PET sheets, delivering an uncompromised balance of hygiene, durability, and product protection. Designed with a built-in, secure hinged closure, these containers eliminate the need for separate lids while keeping bakery treats and dry snacks completely fresh, safe, and visually appealing.

KEY PERFORMANCE HIGHLIGHTS

- **Ultra-Clear Product Visibility**

  High-transparency PET material highlights delicate pastries, sweets, and snacks, enhancing impulse shelf appeal and premium visual presentation.

- **Integrated Hinged Lock :**

  Features an easy-to-lock, snap-close hinged mechanism that ensures hassle-free handling, prevents accidental spillages, and maintains an airtight locking.

- **Hygiene & Structural Integrity :**

  Engineered from durable, food-grade plastic sheets to resist warping, protects delicate contents, and ensures maximum food safety across every storage level.

- **Bakery & Confectionery Focus :**

  Purpose-built for sweet shops, commercial bakeries, cloud kitchens, and retail outlets requiring reliable protection for both delicate goods and everyday consumable items.

PP MEAL TRAYS

Plastcraft's PP Meal Trays offer an all-in-one packaging solution designed specifically for takeout, food delivery, and outdoor commercial catering. Crafted from durable in-house PP sheets, these parcel meal boxes deliver secure, spill-proof food packaging solution that preserves food freshness, temperature, and visual appeal throughout transit.

PLASTCRAFT® INDUSTRIES PVT. LTD.

KEY PERFORMANCE HIGHLIGHTS

- **Multi-Compartment Versatility :** Available in flexible configurations ranging from 3 CP to 8 CP thali formats, allowing complete, single & multi-course meals to be served neatly.
- **Spill-Proof & Freshness Lock :** Features tight-sealing closures to prevent liquid leakage and flavor transfer between compartments, keeping meals intact and fresh.
- **Sturdy & Heat-Tolerant Construction :** High-rigidity PP material withstands hot food contact without warping or compromising container strength.
- **Delivery & Foodservice Optimized :** Purpose-built for restaurants, cloud kitchens, meal delivery providers, and outdoor caterers requiring hassle-free, transit ready food packaging.

HIPS CUPS

80 DIA : 55ML, 100ML & 80 GM

95 DIA : 200 GM

WITH 6 COLOUR PRINTING

High Impact Polystyrene (HIPS) cups provide a premium, highly functional packaging solution designed to give dairy and ice cream products a distinctive visual identity with full hygiene and flavour. These cups combine structural durability with high-quality, 6-color dry offset printing to ensure your brand stands out in a crowded market.

KEY PERFORMANCE HIGHLIGHTS

- **Vivid 6-Color Dry Offset Decoration :** High-precision printing capabilities render sharp graphics, vibrant colors, and crisp logos directly onto the cup, elevating shelf presence and brand recognition.
- **Dairy & Ice Cream Industry Focused :** Purpose-built for ice cream, sundaes, curd, flavored yogurt, cheese spreads, and frozen desserts.

PP JELLY CUPS

Plastcraft's PP Jelly Cups offer a hygienic, lightweight, and precise portion-control packaging solution tailored for confectionery industry. Manufactured from high food-grade polypropylene, these cups provide exceptional clarity, crack resistance, and reliable freshness protection for single-serve

KEY PERFORMANCE HIGHLIGHTS

- **Portion-Control Versatility :**
  Ideal for single-serve jellies, puddings, flavored gels, condiments, dipping sauces, and small confectionery items.
- **Heat-Sealable & Leak-Proof :**
  Fully compatible with foil heat-sealing process to ensure spill-proof transportation, tamper resistance & extended shelf life.
- **Thermal & Crack Resistance :**
  Tough PP construction prevents splitting or cracking during high-speed filling, stacking, and cold-chain distribution.
